It's designed to capture the attention of guests, providing a sneak peek of the upcoming celebration. The Home page will also direct visitors to the other sections of the website.

## Groom & Bride

This section highlights the love story of the couple. It gives guests an opportunity to know who's the groom and bride individually, their name, social media and a romantic message from them for their partner. It's a personalized part of the website that helps guests connect more with the couple's journey before the big day.

## When & Where

The "When and Where" section contains essential information about the wedding date, time, and venue. This ensures that guests know exactly when and where the event will take place. It also serves as a reminder for all the details guests need to attend the wedding, making it convenient for them.
